Course 11	D55, D65, D75, D14	4,06km	14	0
Course 12	D/H11, D/H12 Beginner	1,56km	8	0

Finish time keeping:

Bitte dafür im Ziel stempeln!!! Please punch at the finish!

SPORTident:

Die Kontrollstationen werden im Air+ Mode vorbereitet, der Erfassungsbereich beträgt **30 cm**.

The control stations are prepared in Air+ Mode, the registration range is 30 cm.

It is very important to ensure that the battery in the SIAC has sufficient power before it is used at an event. The station "SIAC Battery Test" can be used to perform a straightforward test.

AIR+ functionality is enabled at an event by the CHECK-process after the chip has been cleared.

The CHECK-process is mandatory for all SPORTident AIR+ applications. AIR+ functionality is switched off by the FINISH-punch.

Remember!

The active antenna of some GPS-watches can significantly reduce the SIAC's sensitivity. As a general rule a GPS-watch and SIAC shall not be carried on the same arm.
